

Brand Guidelines

Identity

New Paltz Esports Association is an organization dedicated to giving its players opportunities in the space of Esports, or competitive gaming. We participate in leagues for our teams and promote them so that they can reach their fullest potential.

Our design style follows from this, and other Esports branding. We hold a very maximalist style in our works and use a lot of jagged edges and harsh lines in order to sell our competitive nature and grit as a club.

We also follow a lot of New Paltz brand identity in what we make. It must be apparent to outside schools, leagues, and organizations that we represent New Paltz in the Esports space so and confusion on that front would be unideal. It is also important though to set ourselves apart from other New Paltz centric clubs on campus. This is done through several aspects discussed later with our Iconography and Texture sections. Firstly though we are a student organization so make sure to have fun with the designs you create and promote our community in the best ways possible!

Colors

For colors we mostly standard New Paltz colors to show our alignment to the school. This is especially important when interacting with other schools or Esports programs. We do try to use these colors in differing ways from how the school uses them though in order to still stand out from other campus organizations.

Color Usage

Background Color should be one of the blues, preferably the darker blue, in order to stand out from traditional New Paltz Branding. Orange is used traditionally as the accent color for borders, lines, stripes and other iconography.

Colors can be changed for event specific graphics as those can have their own unique style but should still at least partially reference New Paltz Esports branding.

Ex. First To Fund or Ultimate Fundraiser branding.

Main Logos

These are the main logos for New Paltz Esports and should be used to represent our organization on everything produced for the club. You can see additional supplementary logos and their uses below. Note that the logo does not utilize fonts in our brand system. This is due to campus restrictions on their font and in order to help us stand out.

Supplementary Logos

Profile Icon for Socials

Profile Icon and Logo for our "Orange Teams"

Logo Usage

Avoid the following:

- Obstruction of the logo
- Use of Grain filter on the logo
- Changing the colors of the logo (outside of select variations or event-specific branding)

In general, as long as the logo is visible and unmodified then it is being deployed correctly. Usage of both PNG and SVG versions of the logo is permitted but is suggested to use SVG where applicable if for highest quality.

Iconography

A big part of New Paltz Esports' design style is how you use shapes and iconography. Most of our design have a combination of these jagged stripes and shapes, often in orange, that coincide with how our logo has a lot of jagged lines and our general design style revolves around maximalism and jagged lines. You can see some examples as well as how they were used below but there is no hard shape for these jagged lines and they can be made in a way that fits the design best.

To register for any titles within SUNY Esports please contact Liana Ferguson (fergusa4@newpaltz.edu) or Skyler Cain (cains@newpaltz.edu) before the registration deadline!

Texture & Backgrounds

Another very important part of New Paltz Esports' style is texture. Use of the grain filter or grain textures on the backgrounds makes us stand out from other campus organizations and sells this style as our own. Its one thing that allows people to recognize our club apart from others and sells the competitive and gritty nature of our club to people interested in what it has to offer. You can see here how we use these textures.
